PROFESSIONAL SUMMARY

Dedicated Junior Full Stack Developer with 3 months of industrial experience in building full stack web applications. Proven ability to build scalable REST APIs, integrate frontend-backend systems, and collaborate effectively in Agile teams. Passionate about delivering clean, efficient, and user-centered web solutions.

WORK EXPERIENCE

Sita Software

Junior Full Stack Developer (March 2025 – June 2025) | Full Stack Development Intern (December 2024 – March 2025)

Key Contributions:

- After showcasing excellent technical proficiency, teamwork, and problem-solving abilities throughout the internship, I was promoted to Junior Developer.
- Developed full-stack web applications using Next.js, Node.js, Express.js, and MSSQL to create performant and scalable web applications.
- Developed secure login systems using JWT and Role Based Access Control (RBAC) to strengthen each application security.
- Worked closely with designers and other back-end developers within Agile Sprints to develop seamless and responsive user experiences.
- Utilized version control methodologies utilizing Git and developed clean and modular code.
- Developed and connect REST APIs with dynamic front ends using Next.js, Redux Toolkit, Axios, and React Query.

SKILLS

Frontend: React.js, Next.js, Redux Toolkit, React Query, JavaScript, TypeScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Nest.js, RESTful APIs

Databases: MongoDB, PostgreSQL, MS SQL Server

Authentication & Security: JWT, Role-Based Access Control (RBAC)

Tools & Platforms: Git & GitHub, Visual Studio Code, Postman, Figma, npm, pnpm, yarn

EDUCATION

- **Swoyambhu International College (2020 – current)**
Bachelors in computer application
- **Nepalgunj Technical college (2015 – 2018)**
Diploma in Computer Engineering

PROJECTS

General Accounting System

Tech Stack: Node.js, Express.js, Next.js, MSSQL

- Developed a modular accounting system with dynamic role-based access control (Admin, Teller, Customer).
- Implemented RESTful APIs for managing accounts, transactions, and reports.
- Integrated secure authentication and session management using tokens and middleware.
- Enabled dynamic frontend routing and layout based on user roles in a scalable architecture.

Multivendor Ecommerce Backend

Tech Stack: Node.js, Express.js, MongoDB

[Github Repository](#)

- Developed a backend system for a multi seller ecommerce platform with structured RESTful APIs and secure route handling.
- Implemented seller and customer authentication with JWT and role-based access control for protected endpoints.
- Used Multer for handling product image uploads with validation and storage configuration.
- Built core modules for product listing, order management, and admin controls.
- Followed modular coding practices with environment-based configurations, error handling, and database abstraction.

CERTIFICATIONS

- Web Designing & MERN Stack Development – Broadway Infosys Pvt. Ltd
- React for Full Stack Development: Build Modern Web Solutions – Uplatz Training (Udemy)

LANGUAGES

- English, Nepali, Tharu, Hindi
